DR. IMEE PRISCILLA P. SANCHEZ
Chair, Human Resources Management Office
Laguna Polytechnic University – Los Baños

Dear Ma'am,

Warm greetings!

We are a group of Bachelor of Science in Computer Science students from the College of Computer Studies, currently enrolled in CMSC 309 (Software Engineering 1). Our group is developing an AI-driven system, *ResuMatch*, designed to enhance resume screening and job matching processes by improving accuracy, efficiency, and fairness in recruitment.

As part of our research, we aim to test this system within our institution to assess its effectiveness and gather feedback for refinement. We would greatly appreciate the opportunity to collaborate with your office, leveraging your expertise and hiring preferences to help us calibrate the system. Additionally, we hope to conduct a simulation by comparing the results of our AI system with your office's recruitment outcomes.

We value your time and support and are eager to hear your feedback on this initiative.

Very respectfully yours,

Aldridge Rainhart Elumacas
College of Computer Studies, Student

Danniel Paul Molleno
College of Computer Studies, Student

Rebecca Gomez
